

Popsicle Sled

Included in kit: Popsicle sticks, decorations, bell, twine

Not Included: scissors, hot glue

1. Glue the light colored popsicle sticks together on their sides. I found the best was to brush the glue on the sides of the sticks and hold them together until they adhered.
2. Glue the dark popsicle sticks to the bottom of the light colored sticks.
3. Then glue the bells and garnishment to the top of the sled.
4. Then the twine to the bottom to hang the sled if desired.
